01 PROFESSIONAL SUMMARY

Analyst combining capital markets fluency with data analysis and AI-augmented software engineering. Reached **consistent profitability trading NIFTY 50 index options within 1 year**, working across indicator-based trend systems, complex multifactor algorithms, and quantitative options-selling strategies. Designs and delivers production fintech systems by leveraging Claude, Perplexity Finance, Gemini Notebook and Higgsfield AI alongside modern software engineering technologies, including an automated bonds alert system, a custom options backtesting engine, and equity research dashboards.

02 PROFESSIONAL EXPERIENCE

Developer | Built Automated Systems & AI-Driven Workflows | Contract Work APR 2026 - JUN 2026
Confidential Client | Deepsea Finvest | Private Wealth Management | Mumbai, India

- Cut bond opportunity discovery from manual daily screening to **qualifying alerts within 10 seconds** by building a Python system that continuously monitors the NSE bond exchange and secondary markets including Bondbazaar, screening listings on yield, coupon structure, zero-coupon status, ISIN and quantity, and pushing qualifying AAA and AA rated secured bonds to Telegram/Discord with full trade detail.
- Consolidated multiple vendor data feeds covering **200+ unique ISINs** into a single master workbook, eliminating manual cross-source comparison, by building a Python pipeline (openpyxl, WeasyPrint) that generates client-ready Excel, PDF and HTML deliverables from one data model.
- Achieved **27.24% CAGR** on a multifactor, EMA-based NIFTY 50 options-selling strategy backtested across **2 years 4 months** of historical options data, by building a custom Python backtesting engine with an India-specific cost model (STT, brokerage, slippage, stamp duty) and sourcing market data through Dhan and ICICI Breeze broker APIs.
- Prevented a **SEBI algo-trading compliance breach** ahead of the firm's shift to systematic execution by identifying that each client API key requires a dedicated registered static IP, and specifying the hosting fix.

Associate Analyst, Business & Operations JUN 2024 - MAR 2026
SOLAS MODU, Marine Services & Offshore Consultancy | Mumbai, India | solasmodu.in | solasmodu.net

- Led the full redesign and rebuild of the corporate website, giving each of the company's **6 service divisions** a dedicated page (surveys, advanced NDT, survival systems, ship design, broking, collaboration) so prospective clients reach the exact capability they need instead of scanning one generic services page.
- Structured a decade of offshore project history into an **operations log covering 11+ campaigns** for ONGC, IOCL and Jagson, from 2013 through contracts running to 2029, so prospective clients see verifiable delivery history rather than generic capability claims.
- Delivered the rebuild through structured AI-assisted engineering workflows in Claude Code (Skills, Harness, Model Context Protocol), owning architecture, technical decisions, review and validation at each stage.
- Replaced manual performance compilation with interactive KPI dashboards and rebuilt recurring management reporting, giving senior management real-time visibility across **3 strategic initiatives**.

Digital & E-Commerce Lead | Contract Work APR 2026 - PRESENT
Al's & Jo's, Home Décor Retail | alsandjos.com

- Building the storefront journey and cutting time-to-publish for new catalogue items **~60%** by structuring the WooCommerce content model, standardising listing templates across **4-6 categories**, and automating updates through a **custom Model Context Protocol integration** against the WordPress API.

03 PROJECTS

CARLTSOLAS Engineering | carltsolas.com | carltsolas-website.vercel.app TECHNOLOGY VENTURE
• Building a technology venture delivering **modern software and AI-integrated solutions** to the marine and maritime industry, with expansion into fintech; scope spans business automation, custom software and digital product engineering, and I designed and shipped the production launch platform.

Brahmos Capital | brahmos-capital.vercel.app NSE DEFENCE RESEARCH
• Equity research platform tracking **25 listed Indian defence stocks** with live pricing, analyst target consensus, an AI conversational analyst, and a geopolitical risk tracker mapping conflicts and defence budget announcements to portfolio impact, on an automated fundamentals refresh pipeline.

Options Academy | options-academy.vercel.app OPTIONS EDUCATION PLATFORM
• Interactive platform simplifying derivatives for beginner and intermediate traders, covering calls, puts and buy-versus-sell mechanics through worked Indian-market examples and **interactive INR payoff calculators**; continuously expanded with new strategies and learning material.

04 EDUCATION & CERTIFICATIONS

Fr. Agnel, Bandra | B.E. Artificial Intelligence & Data Science | 8.6 CGPA 2020 - 2024
Rajhans Vidyalaya | Grade XII, CBSE | 85% 2020
R.N. Podar School | Grade X, CBSE | 95% 2018

CERTIFICATIONS Google Data Analytics Professional Certificate | Data Analysis and Visualization with Power BI, Microsoft | Preparing Data for Analysis with Microsoft Excel, Microsoft

05 SKILLS

Data & Business Intelligence: SQL, Python (pandas, NumPy), Advanced Excel, Power BI, Tableau, Data Modelling, Exploratory Data Analysis, KPI Design, Dashboard Development, Data Storytelling, Predictive Analytics
Financial Markets: Equity Derivatives, Index Options, Options Strategy Design, Backtesting, Equity Research, Fixed Income, Corporate Bonds, Yield & Credit Analysis, Portfolio Analytics, Financial Modelling
Engineering & Automation: Python, REST & Broker APIs (Dhan, ICICI Breeze), openpyxl, WeasyPrint, Telegram & Discord Bot APIs, WordPress/WooCommerce, Claude Cowork, Higgsfield AI, Automation Scripting
AI Engineering: Claude Code, Model Context Protocol (MCP), Agentic Skills, Agent Harness, Agent Swarm, Agentic Automation, AI-Assisted Development, Prompt Engineering, Generative AI
